

Dear State Oncology Society Forum Members,

I hope this message reaches you in good health. We have heard from many of you regarding your concerns about the current chemotherapy drug shortages; in particular, both carboplatin and cisplatin.

The Policy & Advocacy Team has been working with our member institutions and leadership team to address the critical issue of these chemotherapy drug shortages impacting providers and patients nationwide.

NCCN has released a comprehensive quote and statement regarding the national chemotherapy drug shortages after surveying our member institutions:

[NCCN Full Statement on Chemotherapy Drug Shortages](#)

We will continue to monitor this situation and push for innovative solutions.

Respectfully,

Sean T. McCarson, MPA
